If clothes are set on fire by spilling oil or by bursting of a lamp, a handful of flour thrown on immediately may be the means of quenching the flames and thus saving life.

The more improvements are made in a village the more the value of the village property is enhanced and the more inducements are offered for outsiders to come and locate in our midst. Our property owners are doing their level best to see how much they can beautify their premises, and we are safe in saying that we have as neat and clean a village as there is in Michigan.

Since the fine weather set in, quite a number of the youngsters have got into the habit of playing "hooky" from school. Parents would aid the teachers greatly in their work if they would see that their children attend regularly, as the vacation will be on hand in about six weeks, and teachers have to work at a disadvantage where the pupils attend only one or two days in a week.

The Spring Hill cheese factory, owned by Geo. W. Bradshaw, started operations for the season last Monday. This institution has received a thorough overhauling, and a larger boiler and more machinery has been added, which will double the capacity of the factory. The Decoration Day issue of the Albany, N. Y., Telegram will be the most original, unique and popular paper ever presented to the American public. Nothing like it ever attemqted by a newspaper in the nineteenth century. As a mechanical wonder and a military literary library there will be nothing to even compare with it issued in this country. It will be printed on red white and blue paper and consist of 16 pages. Order a copy at once of Fred T. Palmer, who is the agent in this place.

One of the best musical treats that ever visited Yale was the Concert given by the Cornwell Grand Concert Co., under the auspices of the M.E. church, in Central hall last Thursday evening. Every feature of the program was of the highest grade and rendered in a first class manner, especially the violin solos of Miss Grace Clark, who took the audience by storm by her fine playing. The singing of Miss Clara and John Cornwall was also very good. Should they ever favor Yale with another visit we bespeak for them a crowded house.

The family of Fred Wagoner, of Greenwood, drove to church Sunday morning and tied their horse to a stake in a fence. During the service the animal broke loose and took the stake with him, and in jumping over a ditch the stake struck on end on the opposite side and the horse landed on it driving the stake about a foot into its side, making a terrible wound. Dr. J. B. Stevens, of Yale, who was summoned at once, removed the stake and dressed the wound. The horse is still alive and it is thought will recover under the doctor's care.

Sneak thieves again effected an entrance into Menerey Bros.' shops last Tuesday night or early Wednesday morning and stole a number of plow points. Nothing else is known to have been taken. The parties who did the act were well acquainted with the premises, as they entered the building through an opening in the east side of the store room and then cut a hole in the door leading into the place where the plow points were and lifted a hook by which the door was fastened on the inside. It is too bad that some person cannot catch these miserable beings in the act and give them a dose of lead.

Many of our kind friends, who "patronize" us by taking the paper, must have an idea that our hands work for nothing, that we steal our paper and can live on air. If they had any different ideas, it seems to us they would occasionally send or bring in what they owe for the paper. It would surprise every one to hear how many delinquents there are- Are you one of them gentle reader? True, each individual subscription is only $1, but several hundred bills for that amount foot up to a desirable sum—for us to have just now. Send along your subscription. Don't wait. Now is the accepted time. The preachers say so, and it must be so. Don't think that we are afraid to trust you to a dollar. It isn't a question of that kind at all. The printers must have their money weekly, and the paper makers must be paid as regularly as the month rolls around. The confounded Government won't let us print dollar bills, and we are forced to look to our subscribers and debtors for the wherewithal to keep the machine running. Send it in.
